Vaccine Administration Comparison

2 Different Fluzone Vaccine Presentations.
2 Different Administration Techniques.

Please click here to see Important Safety Information.
THE INFLUENZA VACCINE YOU CHOOSE DETERMINES THE WAY YOU ADMINISTER IT TO PATIENTS

Fluzone vaccine is available as a standard prefilled syringe. The vaccine is injected into the muscle.\textsuperscript{1,2}

Fluzone Intradermal vaccine is a prefilled device, with an affixed-needle that is 90% smaller. The vaccine is injected into the dermal layer of the skin.\textsuperscript{3-6}

INTRAMUSCULAR VS INTRADERMAL VACCINE ADMINISTRATION TECHNIQUES

While both Fluzone and Fluzone Intradermal vaccines deliver effective protection against influenza, they are administered differently. It’s important that you understand the distinct administration techniques for both.

IMPORTANT SAFETY INFORMATION

INDICATION

Fluzone Intradermal vaccine is indicated for active immunization for the prevention of influenza disease caused by influenza A subtype viruses and type B virus contained in the vaccine.

Fluzone Intradermal vaccine is approved for use in persons 18 through 64 years of age.

SAFETY INFORMATION

Erythema, induration, swelling, and pruritus at the injection site occur more frequently with Fluzone Intradermal vaccine than with Fluzone vaccine. Other adverse reactions to Fluzone Intradermal vaccine include pain at the injection site; headache, myalgia, and malaise. Adverse reactions other than those listed above may occur. Fluzone Intradermal vaccine should not be administered to anyone with a known hypersensitivity (eg, anaphylaxis) to any vaccine component, including egg protein, or to a previous dose of any influenza vaccine.

If Guillain-Barré syndrome has occurred within 6 weeks following previous influenza vaccination, the decision to give Fluzone Intradermal vaccine should be based on careful consideration of the potential benefits and risks. Vaccination with Fluzone Intradermal vaccine may not protect all individuals.

Before administering Fluzone Intradermal vaccine, please click here to see full Prescribing Information.
