

FOLLOW THESE RECEIVING INSTRUCTIONS FOR TEMPERATURE SENSITIVE VACCINES

STEP 1

Open your vaccine shipment *immediately*.

The products within this shipping container are temperature sensitive and must be protected from prolonged exposure to temperatures outside of their specified range.

Sanofi Pasteur and VaxServe® have qualified this shipping container and packing configuration to ensure that your products remain within acceptable shipping temperature range for up to 2 days (48 hours in transit).

STEP 2

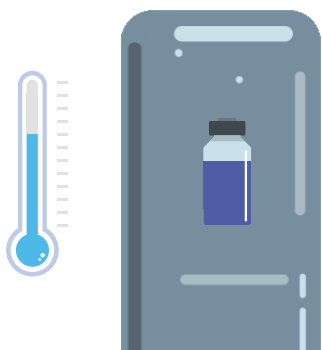

Check the ship date on the outside of the shipping container to ensure product was received within 2 days. If product was received outside the 2-day window, contact Sanofi Pasteur at 1-800-VACCINE (1-800-822-2463) or VaxServe at 1-800-752-9338.

A Ship date

B Package tracking number

STEP 3

Store products as outlined in the vaccine's Prescribing Information

Your shipment may include water bottles and/or frozen gel packs, as well as frozen bricks. *The type and quantity of water bottles and/or gel packs was determined through extensive testing and is based on your geographical location and the temperature that your shipment may experience throughout delivery.*

The water bottles can be unpacked, opened, and the contents poured out. The bottle and cap can be recycled.
