ADAPTIVE VACCINATION SOLUTIONS

Clinic Considerations

Here are some important considerations for choosing the appropriate alternative vaccination solution for you and your office:

1. **Appointments vs Allowing Walk-Ins**
   - Appointments allow you to better control the patient flow, but may be different than what your patients are accustomed to, especially for an in-office walk-thru clinic.
   - If you are thinking about running a drive-thru clinic, consider separate lanes for those with appointments and those without if you decide to offer both options.

2. **Inventory Management**
   - If you have multiple vaccines on hand for different patient types, ensure that inventory aligns with your appointment flow.
   - Work with your sales representatives to coordinate shipping and make sure you are receiving the appropriate quantity needed in a timely fashion.

3. **Staffing Needs**
   - Holding alternative immunization clinics may draw more patients than your practice is accustomed to seeing in a single day; ensure you not only have enough staff on hand, but that they are comfortable interfacing with a high volume of patients.
   - If holding several clinics on different days, either drive-thru or walk-thru, consider reducing the burden by alternating staff to give everyone a well-deserved rest.

4. **Drive-Thru Logistics**
   - If your office’s parking lot is not large enough to hold a drive-thru clinic, consider partnerships with other offices or organizations (i.e., sports teams with large stadiums).
   - Check with your insurance company or payer to ensure the location you choose does not pose any problems with reimbursement.

5. **Billing and Reimbursement**
   - If you are considering running an alternative immunization clinic, it’s important to make sure you have the right tools to process payment and handle billing, especially if doing a drive-thru clinic.
ONE-STOP SHOT WALK-THRU FLU CLINIC

You may find that you and your staff face barriers to traditional immunization methods including logistical flow and patient concerns around unnecessary exposure to COVID-19. Holding a one-way walk-thru flu clinic empowers you to provide patients the opportunity to get a flu vaccination while adhering to the recommended social distancing and congregation guidelines. This module is split into 3 key platforms: PLAN, PREPARE, and PERFORM. Each covers a different aspect of running a one-way foot traffic vaccination clinic: clinic guidance and logistical flow, patient outreach, and office preparation and signage. Together, they form a comprehensive plan that will enable you to run a successful clinic.

To print the One-Stop Shot Walk-Thru Flu Clinic section, PRINT PAGES 4-10, or either visit VACCINESHOPPE.COM® or contact your Sanofi Pasteur Representative to request printed materials.
ONE-STOP SHOT WALK-THRU FLU CLINIC

PLAN

The first step is to prepare your office and staff for running the clinic, with logistical guidance and protocol training. The clinic guidance document provides step-by-step instructions for appointment setting dialogue, preappointment preparation, and during/after immunization protocol. We’ve developed a logistical roadmap outlining how to set up each station and a proposed flow patients should follow to help minimize time in office and exposure to other patients and office staff.

With flu season approaching and the possibility of a re-emergence of COVID-19 in the fall, it’s more important than ever to help ensure patients are protected against influenza to avoid misdiagnosis of COVID-19. In these uncertain times, patients may have hesitations around in-office visits, but immunization is paramount.

**SOLUTION: Hold a walk-thru flu clinic so you can provide patients with the opportunity to get a flu vaccination while adhering to the recommended social distancing and congregation guidelines, ensuring separation between sick and healthy patients, and helping to limit traffic flow through your office.**

**Planning Tips**

<table>
<thead>
<tr>
<th>Know the Flow</th>
<th>Have a plan in place to maintain traffic flow, from entrance to exit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Have the Right Tools</td>
<td>Use the materials checklist provided as a starting point for ensuring you have all the items needed to run the clinic</td>
</tr>
<tr>
<td>Patient Proof</td>
<td>Provide documentation of vaccine administration to all recipients at time of vaccination</td>
</tr>
<tr>
<td>Have a Backup Plan</td>
<td>Ensure backup plans are in place in case of late arrivals or delays</td>
</tr>
</tbody>
</table>
One-Stop Shot
Walk-Thru Flu Clinic

1 PLAN:
Making the Appointment
Verify Patient Insurance Status
- Ask patient to email or fax a copy of their insurance card, if not on record previously, and let them know about any contactless checkout procedures your office has instituted

Review Patient Immunization Records
- Discuss the risks and benefits and review contraindications with patient

Help Ensure Social Distancing During Appointments
- Inform patients to wear appropriate personal protective equipment and to remain in their vehicle, or at a safe distance from others outside the facility upon arrival, and until their appointment time to avoid unnecessary crowds

Set Appointment Time and Provide Directions to the Clinic Site

2 PREPARE:
Getting Ready for the Appointment
Before the Patient Arrives
- Pull the influenza Vaccine Information Statement (VIS) sheet
- Prepare a tray with the appropriate vaccine and all needed immunization supplies
  - Bandages (spot or rectangular)
  - Sharps container
  - Alcohol wipes and sanitizing products
  - Paper towels
  - Cotton balls or sterile gauze pad
  - Thermometer
- Create an encounter in your EHR or paper chart to document immunization
- Put on appropriate personal protective equipment

3 PERFORM:
During the Appointment
Confirm Patient Information
- Provide the VIS sheet and explain how patients should navigate the clinic, along with a reminder of how your office is running contactless checkout if you’ve instituted such a procedure

Administer the Vaccine
Document Vaccinations According to Standard Procedures
One-Stop Shot
Walk-Thru Flu Clinic
Logistical Flow

This blueprint offers guidance for how to set up the clinic site, including station descriptions and the proposed patient flow. Depending on your office setup, you can utilize exam rooms, nurses stations, and staff desks for different stations.

**Patient Queue**
Ensure proper distancing during intake.

**Intake Station 1**
Verify patient appointment and encourage entrance only at the scheduled appointment time.

**Intake Station 2**
Verify patient information and communicate with immunization station to prepare vaccine(s).

**Immunization Station**
Administer vaccine(s).

**Holding Station**
If immunized patient is driving, consider holding them for 15 minutes of observation before discharge.
Depending on the setup of your office or clinic, you can set aside a separate exam room as a holding station or hold them where they receive the immunization.

**Straight to Exit**
If the immunized patient is not driving, consider holding them for 15 minutes of observation; then they may proceed straight to the exit.
ONE-STOP SHOT WALK-THRU FLU CLINIC

PREPARE

This platform serves to help you and your staff with patient outreach. Connecting with your patients is key in reinforcing trust and vaccine acceptance, ultimately setting your clinic up for success. We’ve provided you with messages to use in multiple channels, covering 4 key topics: a one-way walk-thru clinic announcement, office preparation and adaptation protocol, reassurance of the importance of well and sick visits, and both pediatric and adult vaccination importance reminders.

1. Telephone Patient Outreach Communications
2. Email Patient Outreach Communications
3. EHR/Health Portal Patient Outreach Communications
4. Text/Social Media Patient Outreach Communications

Examples

To print the Patient Outreach Communications, visit VACCINESHOPPE.COM® or contact your Sanofi Pasteur Representative to request printed materials.
The appointments are scheduled and the patients are arriving. Time to prepare your office. We’ve included a collection of helpful office signage including a poster with information on symptoms, waiting room signs, traffic flow directions, and a variety of protocol reminders. Also included is a link to download an assortment of FLUency patient education materials highlighting statistics around influenza.

Logistical Signage

**COMMON COLD VS COVID-19 VS FLU FLASHCARD**

**SICK VISIT SIGN FOR WAITING ROOM**

**WELL VISIT SIGN FOR WAITING ROOM**

**Contactless Checkout Info**

In order to better protect our patients and staff, contactless checkout is now available.

To use, please follow the instructions below:

1. Have all waivers, paperwork, and your insurance card ready for checkout. In case they are needed.
2. Only credit cards and payment methods on file will be accepted.
3. A receipt will be sent to your email on file if requested.

Thank you for your understanding as we navigate these uncertain times together.

**REMINDER:**

A face mask or covering must be worn at all times.

Thank you for your understanding as we navigate these uncertain times together.

**PERSONAL PROTECTIVE EQUIPMENT REMINDER**

**SOCIAL DISTANCING REMINDER**

Thank you for your understanding as we navigate these uncertain times together.

---

As flu season approaches, be aware of the different symptoms you may experience with the common cold, flu, and COVID-19. This list is not exhaustive, and other symptoms may be present or overlapping.

If you have any of the symptoms above, please bring it up with your doctor during the appointment. Getting an annual flu vaccine is an important preventative measure to help protect against influenza this season.

**NOTE:** Some people may be able to spread COVID-19 without showing any symptoms.

- **Common Cold**
  - Runny or stuffy nose
  - Sneezing
  - Sore throat

- **Flu**
  - Cough
  - Sore throat
  - Body aches

- **COVID-19**
  - New loss of taste or smell
  - Shortness of breath
  - Fever or chills
  - Cough

REMINDER: Please stay 6 feet away from other patients during your visit.

Our social distancing measures have been implemented to help best protect you, all visiting patients, and our staff.
